Look Then Learn

Combining the science of wonder with the art of photography to create new tools, ideas and insights to transform learning

Learning is about stopping and wondering. It's about looking at the big picture and then discovering what's under your nose, but in new ways.

It's about delighting in what's there but being curious to uncover more. Like photography really. So, it makes perfect sense to bring together a world authority

on the use of wonder in the classroom with a top photographer, author and teacher to create a unique and powerful one-day event for all teachers.

Full of simple, practical ideas for all classrooms this day will change the way you see learners, learning and life as a whole.

Focus: Teaching and learning, engagement. All phases

Teacher and photographer Jane doesn't just take photos. She has the rare skill of capturing the essence of what she sees through the lens, something she shares with teachers in her first book *Learning Through a Lens*, introduced by Mick Waters

From 'Cabinets of Curiosities' and 'Amazing Mazes' to 'Wonder Rooms' ('Every school should have one' – The Guardian) and his Little Book of Awe and Wonder, Matthew's ideas and insights, drawn from his academic research into wonder in learning, engage and inspire all learners.
